

Hello,

**Nasi Goreng** (fried rice) is probably the best-known way of preparing rice in the Indonesian cuisine. As a small thank you for the still regular contributions to «Raja4Rice» we receive from all of you, Dikla from our kitchen team has prepared a traditional Nasi Goreng. Check out the video below to see the individual steps of preparation. Make sure to watch til the end, the whole team also makes a short appearance! You can download the Nasi Goreng recipe [here](#).

By the way, the music for the video is our own interpretation of a song, played by our Pef Band. The lyrics were written by Yanniek, who has been working for Raja4Divers since the beginning. You can download the lyrics [here](#).

We wish you good luck with your cooking and bon appétit!

Many thanks to all who have already bought rice, who continue to support the project and also to those who would like to still make a contribution!

Take me to  
Raja4Rice

## **The Archerfish of Pulau Pef**

Raja Ampat is deemed a «species factory for marine life», and scientists describe the region as one of the most biodiverse seascapes in the world. The lush reefs are home to 75% of all known coral species and over 1,500 different reef fish.

Pulau Pef is a kind of «mini Raja Ampat» and offers not only lush coral reefs but also dense mangrove forests that provide a habitat for numerous marine species. In addition to many other fish species, the mangrove lagoons of our island are also home to numerous Archerfish.

These fascinating animals are particularly notable for their extraordinary hunting behaviour. They are known to prey on land-dwelling insects and other small animals by shooting them with water drops from their specialised mouths or even jumping out of the water altogether.

They are remarkably accurate in their shots and can bring down their prey up to 3 m above the water surface.

When aiming, they compensate for the refraction of light at the air-water interface and normally spit at the prey at an average angle of about 74° to the horizontal, but can still aim accurately at angles between 45° and 110°.

Recently, with the help of a lure, our long-time facility manager Marcel was able to capture the hunting behaviour of Pulau Pef's archerfish on camera. Check out the great footage in the video below!

## Award

Our HR representatives Yanniek and Kristi received an award on behalf of our company from the state insurance company BPJS Ketenagakerjaan and the regional government of West Papua. This award not only stands for a good and smooth cooperation, but above all for the fact that our employees are well insured and that we pay into the state pension fund for them. Despite being a small company, we won second prize for this achievement, which may not be taken for granted in our area of the world.

We are very happy about this, because we think that it is important, especially in these difficult times, to offer security to our employees and their families.

## We are looking for a new Marketing Manager (f/m)

Our current marketing manager Monika will unfortunately leave us this summer

and return to Switzerland. We are therefore looking for a competent successor to complement our team of 60 people .

Would you like to enjoy this view from your office in the future? Are you interested in communicating the beauty of Pulau Pef and Raja4Divers to the world? Are you fluent in German and English and can you imagine a longer stay in Raja Ampat?

If your answer is yes, click the button below to find more info:

Marketing  
Manager

With kind regards from the island,

your Raja4Divers team
